Workaround

Using MICROSAR Safe Silence Verifier (MSSV)

For errors in osekasm.h please refer to *MicrosarOs_Rh850_SafetyManual*, chapter 9.1.

There you can find some instructions for apply MSSV.exe on the OS sources.

For errors in Compiler_Cfg.h please start MSSV.exe with following parameters:

MSSV.exe -i <SourcePath> -i <GenPath> -i <HeaderPath> -D NOASM

Please use MSSV.exe in folder Generators/MSSV and ignore

Generators/MSSV_legacy
